Sen. Vinehout, Rep. Vruwink Introduce “Moving Broadband Forward” Bills

MADISON – State Sen. Kathleen Vinehout (D-Alma) and State Rep. Don Vruwink (D-Milton) introduced their “Moving Broadband Forward” bills today.

The package of four bills provide \$100 million a year in grants for broadband expansion for the next two years. The legislation also removes costly and time-consuming roadblocks when municipalities want to start their own broadband utilities.

Under the bill, municipalities and the state Department of Transportation would be allowed to install empty conduit lines for future fiber optics as part of road and sidewalk projects. This eliminates the need to dig trenches a second time. The “dig-once” policy could save up to 90 percent of the cost of installing future fiber optics.

Also, the bills require that for a service to be called or advertised as broadband it must consistently allow users to download at 25 Mbps (megabytes per second) and upload at 3 Mbps.

“Wisconsin has not been serious about expanding broadband,” Vinehout said. “The Governor returned \$23 million in federal stimulus broadband money in 2011. Since 2014, Wisconsin has approved only \$3.9 million in broadband expansion grants. Minnesota spent \$85 million during that same time.”

The Federal Communications Commission recently reported that 13 percent of Wisconsinites lack access to at least one broadband service provider. In 2016, according to the tech firm Speedtest, Wisconsin ranked 49th in average internet speed.

“Wisconsin is lagging the nation badly in broadband service, especially compared to Minnesota. We have a lot of catching up to do,” Vinehout said. “We won’t be able to ‘Move Broadband Forward’ without a significant investment and a commitment to fixing the problems with current law.”

“The Legislature so far has dropped only pennies into the bank of our broadband infrastructure,” Vruwink said. “In this day and age, high-speed internet is as essential as electricity. It is vital to the economic success of our small towns, villages and cities. Currently, municipalities that want to become internet service providers face too many bureaucratic obstacles. This bill removes the unnecessary obstacles.”

“Broadband expansion today is the rural electrification of the 1930s and ‘40s,” Vruwink said. “I’ve heard from many business owners, farmers, and families around the state who do not have access to broadband internet. That puts them at a competitive disadvantage.”

“We must get serious about Moving Broadband Forward,” Sen. Vinehout said. “Real broadband is an essential service for families, for students, and for businesses. It will do far more to keep and attract young people to Wisconsin than an advertising campaign in Chicago.”
